TEST COMMENTS: A storm on September 2 leveled this testing site leaving over 90% of the plants ankle high and completely lodged. Nearby wind monitoring stations reported sustained winds of 100+ mph for over 3 minutes. Despite an effort to salvage some data, nothing in the test was harvestable. Fields have done well where Mark has harvested off of the ground with a reel. Lat: N43.37154, Long: W-92.41326
