TEST COMMENTS: *This location has always performed well with beans. The plot received alot of rain right after planting. Some fields in the area did not get planted until weeks after this plot was planted. The season was cool for the start of growth. Several small rains at pod fill helped yields alot. A light frost in September slowed drydown and damaged to the tops of plants.* Lat: N41.25068, Long: W-94.08802
