**TEST COMMENTS:** *Most varieties were extremely short, but were loaded with pods. There were more than 50% of the beans that still had green stems, and several with some green leaves. Seed size was large, and the quality appeared good. There was little evidence of any diseases here. Yields were surprising for them amount of rainfall received during the season.* Lat: 40.41277, Long: -92.68363
