TEST COMMENTS: This area is seeing some very good yields this year. It has been a struggle to get the crop harvested due to the wet fall conditions they have had here. These wet conditions keep mature plants damp, never fully drying down. As a result, harvest was slow as fodder was tough. Beans were large in size with a bright seed coat. Some varieties had 6 plus pods/node and short node spacing.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
