Non-GMO \$0.00

TEST COMMENTS: Spring weather conditions were very tough at this location in 2014. The test was planted May 15 but persistent wet and cool conditions resulted in poor seedling establishment. Due to seed limitations, there was no opportunity to replant the test. The test site was abandoned so Ron could replant when the opportunity presented itself.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
