**TEST COMMENTS:** This location was planted on June 11th. Planting conditions were still a bit marginal, but it was the best conditions that the area had seen in weeks. Persistent rainfalls followed planting and 95% of the seeds rotted in the ground. The next window of opportunity for planting was the July 4th weekend. It was decided to not replant.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
