Yield & Income Factors: Base Moisture = 13.0% Shrink = 1.3 Drying = \$0.020 Prices = \$0.10 GMO; \$0.10 non-GMO

TEST COMMENTS: Continued spring rains held up planting in this area. Other tests in the region were planted late. Unfortunately, the opportunity for planting here just did not work out. Many area acres were prevented planted and those that were planted had ponding and final field yields were low despite varieties producing very well (away from ponds) for late planting date.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
