TEST COMMENTS: This plot did very well for being late planted. Planting conditions were not perfect. The area received so much rain that the surrounding field was not planted. Andrew stated that many area late planted farms are very happy with yields. The test was on a hilltop with very good drainage. Plant height range was 24 to 34". Plants had very good pod set, small sized seed and dry stems at harvest.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
