**TEST COMMENTS:** Jason stated that this was an odd year for harvesting soybeans due to poor dry down. They may finish corn harvest before soybeans as a result. So far, he is pleased with soybean yield levels. Plants are mature with dry stems that are 42 to 50" tall. Taller varieties were lodging. No significant disease or weed issues noted. Rainfall July through September was above normal in this area.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
