TEST COMMENTS: These soybeans were tough to harvest. They had a bunch of growth and most were leaning over which made for a harvest challenge. Floyd Snoozy, our host farmer, reported yields over 70 bpa in the field surrounding the test. This plot was situated on a side hill. Yields were lower in the rep on higher ground. South Dakota soybean harvest has been slow this year, due to a lot of damp and cloudy days.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
