TEST COMMENTS: *This site had damp heavy soil at planting which reduced stands. Brandon, Kent's son, said that slug damage to young seedlings was an area problem, severe enough to replant in some cases. Rainfall was limited here, droughty from June to mid-July and August to mid-Sept. A 2.7" rain in late July was the only major rain event. The plot was nearly weed-free. Plants bushed to compensate for lack of stand.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
