TEST COMMENTS: *Lack of rainfall after planting caused a preemergence herbicide weed control failure. Postemergence application of Flexstar for control of emerged waterhemp 3 weeks after planting failed to control, what turned out to be, a waterhemp population resistant to PPO inhibiting herbicides. Handweeding was attempted but the weed population was too great to control. Test was abandoned.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
