### TEST COMMENTS:

*This is a no-till site that planted well during the middle of May. Good stands after planting combined with just the right amount of rain during the growing season helped with uniformity and growth. Above-average rain in July and August with mild late-season temperatures made for full ears with deep kernels. Everything came together this year for this site to make big yields and good data.*

### TEST COMMENTS:

*This is a no-till site that planted well during the middle of May. Good stands after planting combined with just the right amount of rain during the growing season helped with uniformity and growth. Above-average rain in July and August with mild late-season temperatures made for full ears with deep kernels. Everything came together this year for this site to make big yields and good data.*
